LANGUAGE NOTES

- ①是不是 shì bú shì Besides adding the question particle 吗 to a declarative sentence, another common way of forming a question in Chinese is to repeat the verb or adjective in its affirmative and negative form (adding a 不 before the verb). For example, 你吃饭不吃饭? Do you eat or not?
- ②全身没力气quán shēn méi lì qì In Chinese, we do not have the corresponding word for "fatigue". 全身means "whole body", 没is the negative adverb while 力气 means "strength, power".
- ③跟…说一声 gēn … shūo yì shēng This structure means "to tell sb. /to give sb. a note". 说means "to say".
- ④一边…一边… yì biān …yì biān … This structure denotes the simultaneity of two ongoing actions. In general, the word or phrase for the action that started earlier follows the first 一边, while that for the action that started later follows the second 一边.
